HRM PILOT

COMMERCIAL WEBSITE SPECIFICATION & ARCHITECTURE BLUEPRINT

Document Version: 2.4.0 (Enterprise)
Target Role: Web Developer / UI Designer
Status: Approved Architecture

MODULAR ADD-ON MODEL

1. Executive Summary & Purpose

This document serves as the authoritative blueprint for the creation of the public-facing commercial marketing website for **HRM Pilot**. The primary objective of this website is to market and sell the HRM Pilot workforce management platform to external enterprise organizations, multi-branch corporations, and scaling agencies.

> **Strategic Objective:** Deliver an interactive, animated, high-converting digital presence that positions HRM Pilot as an ultra-modern, zero-disruption workforce operating system with transparent, modular pricing.

2. Business Monetization Architecture (Modular Packaging)

To lower client acquisition friction and maximize recurring expansion revenue (LTV), HRM Pilot enforces a **Modular Packaging Architecture** rather than bundling every complex feature into an expensive, rigid base price:

FOUNDATION TIER

Core HRM Base

$3.00 / user / mo

The essential multi-company workforce platform. Included in the mandatory baseline subscription.

OPTIONAL PAID ADD-ON 1

Time Tracker & Biometrics

+ $1.50 / user / mo

Precision web/desktop timers, smart lunch/tea break tracking, and physical biometric device sync.

OPTIONAL PAID ADD-ON 2

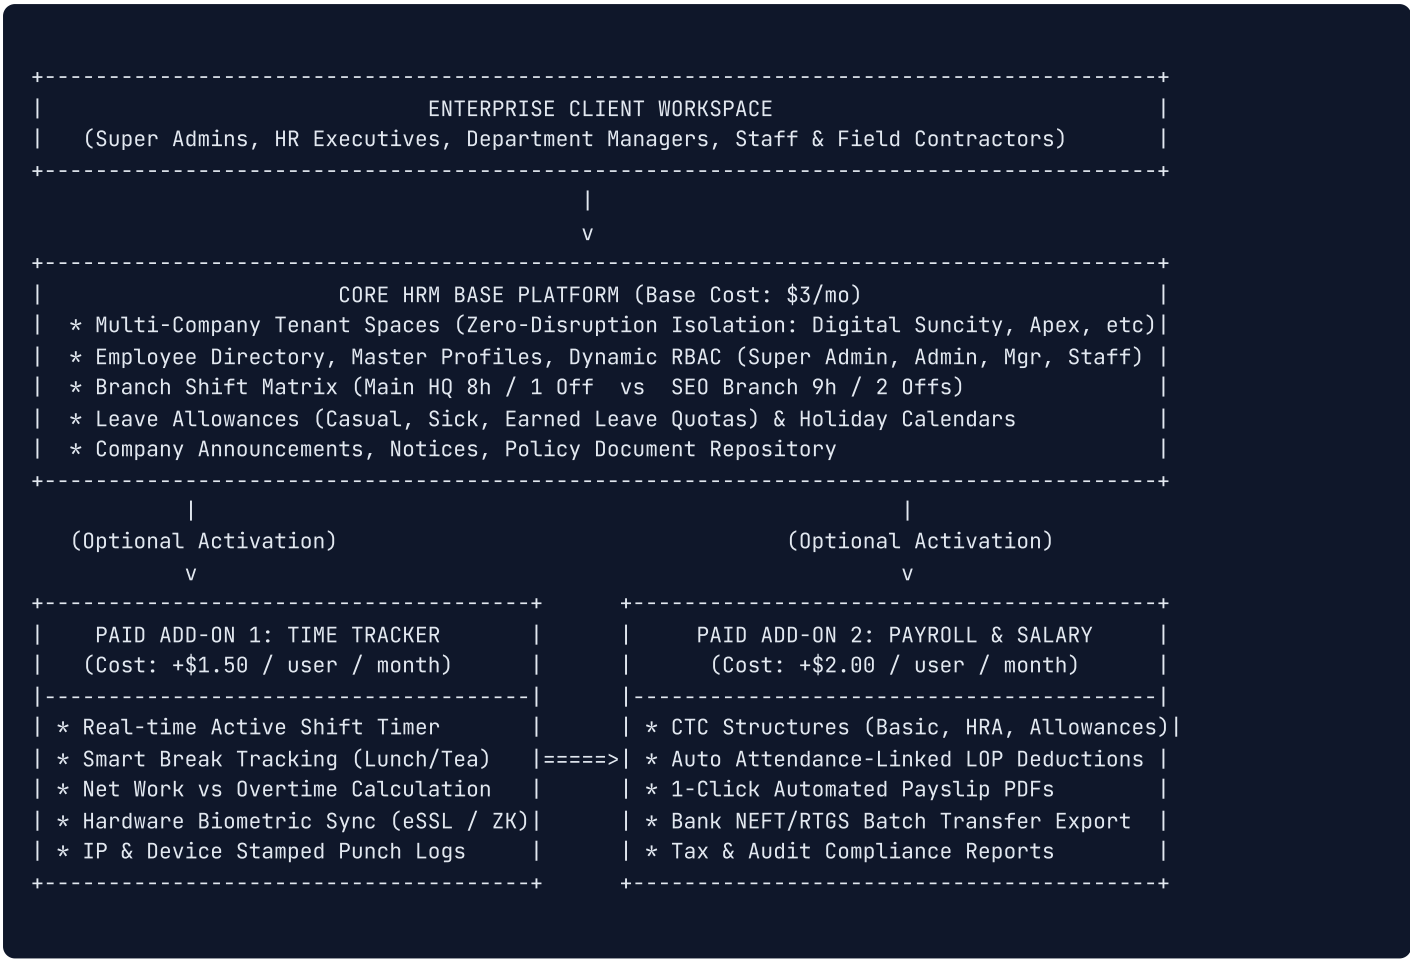

Payroll & Salary Engine

+ $2.00 / user / mo

CTC structures, attendance-linked Loss-of-Pay (LOP), 1-click payslips, and bank batch files.

Why this model works: Clients who already use third-party accounting software or don't require intrusive hourly monitoring can adopt Core HRM immediately without overpaying. As their team grows, they can activate Time Tracking and Payroll with 1 click.

3. System & Data Flow Architecture

4. Detailed Module Specifications for Website Messaging

A. Core HRM Base Platform (Baseline Subscription)

- **Multi-Company Tenant Workspaces:** Allows holding companies and conglomerates to operate multiple distinct sister brands/subsidiaries within a single deployment with zero data leakage. Super Admins switch workspaces in 1 click.
- **Granular Role-Based Access Control (RBAC):** Strict 4-tier compartmentalization across Super Admin, Company Admin, Department Manager, and Employee.
- **Branch-Specific Shift Schedules:** Eliminates shift headaches by assigning customized daily targets per branch (e.g. Main HQ 8h shift with 1 Sunday off vs Marketing 9h shift with Saturday & Sunday off).
- **Automated Leave Quotas:** Configurable Casual Leave (CL), Sick Leave (SL), and Privilege Leave (PL) quotas with multi-tier manager approval workflows.
- **Company Notices & Policy Repo:** Centralized distribution of operational announcements and employee handbooks.

B. Paid Add-On 1: Autonomous Time Tracker & Biometrics

- **Live Shift Timer:** Precision desktop and web clock-in timer running real-time seconds counter with instant multi-device synchronization.
- **Smart Break Engine:** Explicit lunch and tea break modes that automatically pause the net working minutes counter to guarantee accurate target compliance.
- **Hardware Biometric Integration:** Sub-second API/socket sync with office fingerprint and facial recognition scanners (eSSL, ZKTeco, Matrix, Hikvision).
- **Overtime & Idle Surveillance:** Flags shift discrepancies and computes billable overtime hours past the daily shift target.
- **Audit-Proof Punch Logs:** Every punch is cryptographically stamped with employee ID, device ID, IP address, and exact timestamp.

C. Paid Add-On 2: Automated Payroll & Salary Processing

- **Dynamic CTC Structures:** Configurable earnings (Basic, HRA, Special Allowance) and statutory deductions (Provident Fund, ESI, Professional Tax, TDS).
- **Attendance-Linked Loss-of-Pay (LOP):** Directly ingests attendance logs from the Time Tracker to calculate unpaid absences and half-day penalties with zero human calculation error.
- **1-Click Payslip Generation:** Automatically produces password-protected PDF payslips and distributes them to staff employee portals.
- **Bank Batch Dispatch:** Generates ready-to-upload NEFT/RTGS CSV and Excel transfer files compatible with major enterprise banks (HDFC, ICICI, SBI, Chase).

5. Comprehensive Website Structure (Section-by-Section Blueprint)

Section ID	Section Name	Developer Implementation Requirements
`#header`	Sticky Navigation Bar	Logo glyph + HRM Pilot branding + version badge (`v2.4 Enterprise`). Links to Features, Simulator, ROI Calculator, Comparison, Pricing, FAQ. Action buttons: `Client Portal Login` (`/login`) and glowing `Book Enterprise Demo` button.
`#hero`	High-Conversion Hero	Headline highlighting Autonomous Workforce OS. Value proposition. Primary CTA (opens VIP demo modal) and secondary CTA (smooth scrolls to simulator). Social proof badges (SOC-2, 0ms clock sync, 100% data isolation).
`#mockup`	Live Interactive App Canvas	macOS-styled window mockup with live running clock (`HH:MM:SS`), shift progress bar (420m net), active lunch tag, and live punch activity feed stream.
`#logos`	Trust & Client Strip	Corporate logos (Digital Suncity, Apex Global, Synapse, Nexus, Strata) with hover glow effects.
`#simulator`	Interactive Feature Sandbox	4 tab buttons (Multi-Company Tenants, Biometric Punch Engine, Branch Shifts, Leave Engine) with dynamic pane transitions, 1-click workspace switcher, and simulate punch buttons.
`#calculator`	Financial ROI Calculator	Dual range sliders: *Total Headcount* (20 - 1,500) and *Monthly HR Admin Hours* (10 - 160). Real-time JS calculation of monthly hours saved, annual cost savings ($), and payback days.
`#pricing`	Modular Pricing & Configurator	Monthly / Annual billing toggle (20% discount). Pricing cards for Core Base, Full Enterprise Bundle, and Super Tenant Suite. **Interactive Custom Stack Configurator** with live checkbox toggles for Time Tracker and Payroll add-ons.
`#compare`	Competitive Benchmark Matrix	Feature comparison table: HRM Pilot vs Legacy ERPs (SAP/Workday) vs Spreadsheets & WhatsApp across multi-tenancy, biometric sync, custom branch shifts, and pricing transparency.
`#testimonials`	Client Endorsements	Verified reviews with avatar badges, executive titles, and quotes praising multi-branch shifts, biometric sync, and payroll turnaround times.
`#faq`	Interactive FAQ Accordion	Accordion toggles answering questions regarding modular add-on activation, biometric scanner integration, data isolation, and CSV migration speed.
`#modal-demo`	VIP Demo Booking Modal	Interactive pop-up modal capturing Name, Work Email, Company, Team Headcount, and Primary Need. Submission replaces form with instant confirmation screen.

6. Technical & Frontend Design Specifications

- **Color Palette & Design Tokens:**
  - Base Background: Obsidian Dark (`#06090f`, `#0c121e`)
  - Card Surface: Glassmorphic Frosted (`rgba(16, 24, 40, 0.65)` with `backdrop-filter: blur(14px)`)
  - Primary Accent: Royal Indigo (`#6366f1`) with glowing box-shadow (`rgba(99, 102, 241, 0.4)`)
  - Secondary Accent: Neon Cyan (`#06b6d4` / `#38bdf8`) and Emerald (`#10b981`)
  - Subtle Borders: `1px solid rgba(255, 255, 255, 0.08)`
- **Typography Hierarchy:**
  - Display / Headings: `Outfit` (weights: 700, 800)
  - Body / Interface: `Plus Jakarta Sans` or `Inter` (weights: 400, 500, 600)
  - Numbers & Digital Timers: `Outfit` with `letter-spacing: 0.05em` and neon text-shadow
- **Interactive JavaScript Logic Requirements:**
  - `updateLiveClocks()`: Updates all timers every 1,000ms with system zero-padded hours, minutes, and seconds.
  - `switchSimTab(tabId)`: Toggles active CSS class between simulator panels with smooth opacity transitions.
  - `updateCalculator()`: Reads headcount and hours sliders; computes savings using: `Savings = (Hours * 0.82 * $35) + (Headcount * $12)`.
  - `updateCustomStack()`: Ingests base platform rate + checked add-on rates (Time Tracker $1.50, Payroll $2.00) adjusted for monthly vs annual billing.
  - `handleDemoSubmit(e)`: Intercepts form submit, reads email, hides inputs, and displays confirmed VIP booking state.
- **Reference Codebase Assets:**
  - Root Standalone Preview: `hrm-pilot-preview.html`
  - Next.js Web Asset: `public/hrm-pilot-preview.html`
  - Preview Route: `src/app/preview/page.tsx` (redirects to preview)

7. Developer Deliverable Checklist

Status	Requirement	Acceptance Criteria
[ ]	Modular Pricing Representation	Clear separation showing Core Base ($3/mo), Time Tracker Add-on (+$1.50/mo), and Payroll Add-on (+$2.00/mo).
[ ]	Interactive Custom Stack Builder	Toggling checkboxes updates total per-user monthly/annual price dynamically in real time.
[ ]	Live Hardware Punch Simulation	Clicking 'Simulate Punch' outputs instant success notice and increments live counter without page reload.
[ ]	Multi-Company Workspace Switcher	Clicking 'Switch to Space' changes company card highlight and updates active workspace status badge.
[ ]	Fully Responsive Layout	Tested seamlessly across 1920×1080 desktop, 1024×768 tablet, and 375×667 mobile viewports.
[ ]	Demo Request Modal	Form validation on work email; smooth open/close modal interactions with ESC key support.
